Quality Manager

(1) Use: The materials are handled responsibly throughout their lifespan

(2) In good storage indicates that the items are kept in accordance with the due diligence concept, which includes, but is not limited to: Keeping the products in their packaging and in an environment with typical temperature (max 40 °C) and humidity (RH 70-85%) will extend their lifespans. Keeping the items in a location that is protected from rain and other weather factors. The panels should not be kept in storage for more than six months.
